## **An O.I.C. Specialty Laboratory** *Occlusion - Implants – Cosmetics*

### **Digital Smile Design** New from Klausz Dental Laboratories

Your Patients can **SEE** their treatment plan before treatment begins.

We are proud to be able to offer our clients the power and the versatility of the next wave in dental communication. We are now able to provide you with a **Digital Smile Design**, in ready to print full colour, of what your patients can expect from today's cosmetic dentistry.

- Patients see their new smile – before treatment
- Our life-like designs are **clinically achievable**
- Inspiring & motivating for your patients
- Full colour high resolution prints are possible, personalized to your office

We now provide **Cosmetic Digital Imaging** for dentists as a patient communication tool. Educated patients are more likely to commit to sophisticated treatment plans when they can actually see the treatment goal. Dentists use Digital Smile Design to help patients to commit to a proposed treatment plan. Patients love it as they get to see their new smile before treatment begins.

You can choose from just a **Close-up Smile Design** or provide a more powerful **Close-up & Portrait Smile Design** Combination

If you are interested in learning more about how we can help you provide your patients with Digital Smile Designs, why not give us a call, and request the full instructional package.

Be sure to ask about our **introductory pricing** on your first Digital Smile Design with us.

Always looking for ways to improve the quality of our work is just another way we are working harder and smarter for your practice!
